**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell (4936884).

In re independent claims 1, 4 and 7, Campbell discloses a mounting apparatus for attaching a blade to a generally cutting implement (grass cutting), the apparatus comprising:

An elongated base member positioned between the blade having a plurality of vertical apertures (24, 26), a pair of the apertures sized to receive coupling members (24);

Another one of the apertures (26) having a defined surface shape, a cylindrical member (50) passed through the one aperture, cylindrical member having a portion receivably seatable within the one aperture seat and prevents relative movement between the cylindrical member and the cutting implement (see fig 4);

In re claims 2, 5, the aperture has a hexagonal shape design choice (see fig 2, at least has 6 sides);

In re claim 3, the cylindrical member having a nut (52).

***Response to Arguments***

3. Applicant's arguments filed 6/23/2003 have been fully considered but they are not persuasive.

Applicant's argument that the "structure which enables the connection of a tool to a power source and wherein such structure also serves to enable the transfer of power from that power source" and "enablement of these capabilities is commensurate with the structure, and its associated advantages, as they have been described in the remainder of the specification" and that Campbell does not provide such structure, is not germane in consideration/examination of the claimed structural limitations. Examiner noted the amendments made to the claims to bring in functional limitations, however Campbell's structure is capable of providing the stated functions.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
